

Sprint Planning

Stand Up Schedule

1. Tuesday
2. Thursday
3. Sunday - 2 recurring zoom link: <https://uasystem.zoom.us/j/81263846763>

Sprint 1 Goals:

- Database and geotagging done
 - Maybe allow uploads at this sprint
 - Allow the user to update the geotag if they aren't where they were when they took the picture
- Main "pet finder" screen - list view
- Website draft due
- **Assignments:**
 - Dylan: Geotagging
 - Sav: Database
 - Lilly: [Website](#)
 - Asa: UI

Sprint 2 Goals:

- Logging in
 - User profile screen
- Uploading pictures
 - Ask uploader for tags to help with picture matching (give them a drop down list of tags to choose from)
 - Allow a note with animals for misc. Details
 - What tags do we want? Ability to add a tag
 - Address field for location
 - Cat pattern - breed?
- Goal: map view of the "pet finder" screen
 - Figure out how to convert an address to lat/long
- Use email as a unique identifier
- getting markers on the map from the database
- **Planning Meeting:**
 - user uploads- lily
 - Post flagging - *moving to sprint 3*
 - custom geotagging - asa
 - user profiles - asa
 - 5 test cases - dylan
 - read and write from the database - sav (Post Page DONE, Feed Page DONE (thanks Asa))
 - dylan gets program working on his phone - DONE
 - research more in react native and firebase - done

Sprint 3 Goals:

- Cleaning up, documentation, backlog
- Picture matching
- Bug fixing/Testing
- Final project video
- Flagging posts and noting strays found
