<u>Goals</u>

For this sprint we wanted to finish implementing functionality. We are completing the post page with an image picker, working on the profile page, creating test cases and getting uploads working. We are also planning out our last sprint and how to most effectively use the third sprint.

<u>Sprint 2 Backlog</u>

TOTAL RESEARCH TIME - 69 hours

Implement Image picker+carousel [Done, 10~]
Get database uploads working from the user uploads screen [Done, 12~]
